

MLS Authorization for Single Sign-On (SSO) With Flexmls Web

Please sign and return to your FBS sales or support representative via email this form in order to request FBS to set up single sign-on (SSO) services for your MLS (“the MLS”).

By signing this form, the MLS approves FBS to route the user login and authentication process to a new web site address in the form of <https://mls.flexmls.com>, where “mls” is the short code established for your MLS.

FBS will provide the standard setup for SSO to the MLS at no additional charge. In addition, there will be no fee to third parties wishing to use flexmls SSO. Charges may be incurred for implementing or using SSO if:

- Non-Default Settings: The MLS wishes to change anything about the default setup.
- Third-Party Consulting: The third-party wanting to use flexmls SSO is unfamiliar with SAML and needs help getting set up. Third-parties familiar with SAML should be able to integrate flexmls SSO by following the documentation here.

Charges will be on an hourly basis at FBS’s then current rate for programming (currently \$300 per hour).

By signing the agreement below, the MLS approves of FBS implementing flexmls SSO.
